## **COMPUTERLINKS To Deliver New Security Certified Program Certification Training**

April 1<sup>st</sup>, 2008 – COMPUTERLINKS announced today that their training centre will include the new Security Certified Program certification training in their schedule.

The new Security Certified Program certification training includes in-depth discussion and hands-on exercises suited to meet the needs of today's IT Professionals who are seeking high quality information security training.

The first course in the SCP certification track is Tactical Perimeter Defence (TPD). TPD offers students an intense learning experience on the following IT security topics: Network Defence Fundamentals, Advanced TCP/IP, Routers and Access Control Lists, Designing Firewalls, Implementing IP Security and Virtual Private Networks, Designing and Configuring Intrusion Detection Systems, and Security Wireless Networks. After completing this training all students can attempt the SC0-451 exam for the Security Certified Network Specialist (SCNS) certification.

The second course in the SCP certification track is Strategic Infrastructure Security (SIS). SIS offers students offers student an in-depth hands on training experience in the following IT Security areas: Cryptography and Data Security, Linux Security, Windows Security, Attack Techniques, Security on the Internet and WWW, Performing a Risk Analysis, Creating Security Policies, and Analyzing Signatures, After completion of their SC0-451 exam and SIS training all students can attempt the SC0-471 exam for the Security Certified Network Professional (SCNP) certification

Mark Patrick, VP of Sales and Marketing for Security Certified Program states, "We are excited to have COMPUTERLINKS deliver authorized Security Certified Program certification training. SCP Authorized Training Partners meet and exceed strict requirements for instructional delivery of our courses. SCP ATPs are required to use certified instructors, official SCP curriculum, and are held to the highest quality control standards through continual evaluation."

Talal Kheir, MD of Entegraty LS, representing SCP in Europe, said "COMPUTERLINKS is pioneering the introduction of SCP in Germany, after months of careful study of the market; COMPUTERLINKS opted for delivering SCP courses

throughout the territory. We at SCP-Europe will ensure that COMPUTERLINKS is well supported and successful in its endeavours.”

### **About COMPUTERLINKS**

The COMPUTERLINKS Training Group, the training division of COMPUTERLINKS AG, offers comprehensive, flexible and individualized courses. Our training portfolio ranges from open seminars and workshops to individual training and is aimed at specialized trades and system vendors. We offer attractive incentives to resellers who book companies and private users to attend COMPUTERLINKS training courses. COMPUTERLINKS courses are taught by highly qualified trainers with extensive practical experience. All trainers are salaried employees of COMPUTERLINKS and possess every certification available in their field of expertise. The trainers spend more than half of their working hours in second level support. This means that they are constantly gaining experience – an optimal basis for meeting the needs and answering the questions of the training course participants. All COMPUTERLINKS training centers are vendor-certified. Our complete training portfolio is available at our Frankfurt and Munich sites; all e-security and Citrix courses are available in Hamburg and Duesseldorf. In 2005 we trained a total of 1,250 technicians in Germany. The greatest demand was for training in Citrix, Microsoft and Check Point. Our annual turnover for training courses was €4.7 million in the German-speaking countries.

We offer:

**Open seminars:** The best opportunity for individuals to gain professional qualifications. Up to six participants, in some cases from different companies, can take part in the open seminars. The language of the course and of the vendor-provided resources is German; English is available upon request.

**Individual sessions:** Private courses especially suited to training employees of a particular company. You can decide on the course content and teaching emphasis for your team, or develop a course to meet your needs with our assistance. Course materials and training are offered in German or English. You can either utilize vendor-supplied materials or your own materials for the course.

**Accelerated training:** These intensive courses are concentrated, performance-oriented courses based on the open seminars. The content of various courses is offered in compact form to provide the same knowledge in a shorter amount of time. The participants are required to work through the exercises outside of the class in order to digest the information taught during the day. Accelerated training is available with individualized course content.

**The COMPUTERLINKS knowledge guarantee:** Providing you with knowledge is our highest aim. At COMPUTERLINKS, we've introduced a knowledge guarantee to give you more confidence when choosing your course: If you're not satisfied with the outcome of one of our training courses, you can repeat the course within the next six months – free of charge.

**About SCP**

The Security Certified Program (SCP) ([www.SecurityCertified.Net](http://www.SecurityCertified.Net)) provides real world, hands-on security education that will improve job skills and create more secure organizations. SCP also develops multi-level, vendor neutral, security certifications to go along with their training courses. This enables individuals to validate that they have acquired the necessary job skills. Certifications include the Security Certified Network Specialist (SCNS), Security Certified Network Professional (SCNP) and Security Certified Network Architect (SCNA). Training is available through SCP's global network of authorized training partners. The Security Certified Program, LLC is a privately-held company, based in Illinois, USA. For more information, please visit [www.SecurityCertified.Net](http://www.SecurityCertified.Net).

**About Entegraty LS**

Entegraty LS through its managing Director, Talal Kheir, has been involved with the SCP program since 2002 (via the old company name Security-4IT). Upon the re-launch of a new powerful and invigorated SCP, Entegraty LS took on again the role of expanding, supporting and distributing courseware for SCP in Europe.
